China, US and DPRK

In relative research we see China's "tianxia" all under heaven philosophy come to fruition. (Refer the art of war - Sun Tzu). And in China US relations we must observe their powers in political ethics as they continue unifying. The realism hon K Rudd speaks of is to guide towards unto spiritual soothe. Thus, the DPRK I believe are in communication with China as we refer to transcript of the UNSC res 2270. China have been transparent in their defence white paper 2015. Remarking "off shore defence to open seas protection". However, my philosophy is that it only takes one WMD (weapon of mass destruction) to hinder progress of peace and accord. And, tyrannical actions will be punished. Intelligences to monitor. Therefore, negotiations with US, DPRK and China as a gesture for political good will of strategic partnerships is to ensure that demands are met. For instance the DPRK already hold WMD and to eradicate under their leadership will hold no guarantee that they could be kept and utilised. Therefore negotiate with common knowledge and empirical data and hold steadfast to ensure that no race for more weapons are cast.

Lili.
