

On Behalf of Maltese Multicultural Community in Adelaide

My Name is Joseph, email address is [REDACTED], and I do run as a Chair Person of the largest Maltese Multicultural Community Centre in Adelaide been operating since 1948.

As a pensioner of 71 years old soon I be 72 with a disease caused on my from my old Jobs here in Australia going back 53 years ago, fibroses of the lungs, now living on oxygen most of the time, Grand Father of 10 all grown up and working, good tax income for Australia, and 4 Great Grand Children, will be more Taxes collected, so I created future income for Australia, that was the idea of migration, these days hardly you find any Europeans want to come to Australia.

I arrived in Australia as a migrant 1962, I worked very hard and paid my big taxes, as we always been and still is the highest tax payer in the world, when I heard our Prime Minister saying that we don't deserve the pension that was very cheeky and insulting to older Australians, Dear Prime Minister, we worked for the Pension, how about you and all politicians if don't get no pension at all, were you don't needed to live anyway, what you guys are doing for Australia?, all you doing is stuffing this country up.

How about start charging decent funds from our resources that you are giving away to the Asian Countries, were we are paying 7 times more against the price they pay, "GAS, IRON ORE, COPPER, MEAT" you name it, if you start charging these Countries a fair price like we pay, then you not only can pay the politicians a good pension also the aged that build this Country of Australia were it is to-day.

The Commonwealth Gov. of Australia Signed a treaty with Malta, don't go around start changing things behind the Aged Back, one advice that I always said for this past 30 years or so, any Government touches a cent from the pensioner, will be stamped for life, and you will never win government for the next 50 years as it will goes into families brains for a long time, take my word for it, then any political party is in Gov at that time will stop existing.

Regards

Joseph
