Subject: Foreign Policy

Hello

I expect the Australian government to respect International Law and support United Nations policies and act honestly and decently in all our foreign policy decisions, especially in Palestine.

The recent obsequious genuflection towards Israel was embarrassing to watch and it completely overlooked the well documented crimes against humanity carried out by Israeli governments, including of course, the present hard right faction behind the recently feted Netanyahu.

Such behaviour is not foreign policy.
It a fawning policy.

Richard Middleton
